

B & K Timber Structures

A trading division of B & K Steelwork Fabrications Limited

The Environmental Policy Statement of B & K Timber Structures

B and K Timber Structures have the highest regard for the environment, conservation and the principle of sustainable development. We will at all times comply with all applicable environmental legislation and promote the economic use of materials and energy

Our aim as a company is to reduce our environmental impact, reduce waste and promote recycling at all levels from both our own fabrication and construction activities to those of our suppliers and sub-contractors.

We will liaise with our clients on potential environmental issues and work with them to address issues and concerns, in so far as the project constraints permit at every location under the company's control.

As Construction Director I am fully committed to the promotion and identification of environmental responsibilities within the company, and as such will ensure that the company's environmental policy is formally and regularly reviewed.

To ensure achievement of this commitment the company is working towards an Environmental Management system (EMS) in accordance with the requirements of BS.EN.ISO 14001:2004. The EMS management system will be certified by a UKAS accredited body. Therefore compliance with this policy and all the associated, formal procedures, by BKTS staff and contractors is a mandatory requirement.
